REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior arts fail to teach a parallel sense amplifier includes a measuring branch for receiving an input current to be measured, a plurality of reference branches each one for receiving a reference current, and a plurality of comparators each one for comparing a voltage at a measuring node along the measuring branch with a voltage at a reference node along a corresponding reference branch, wherein the amplifier further includes a multiple current mirror for mirroring the input current into each reference branch. Furthermore, the prior arts fail to teach a sensing method using such circuit which includes the steps of "generating an input signal in response to an input current", "generating a first output signal in response to a combination of a first reference current and a first output current that is related to the input current", and "determining a value of the input current from the input signal and the first output signal", and wherein generating the first output signal comprises conducting the smaller of the first reference current and the first output current through a conductive path and generating the first output signal at a node of the conductive path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
